EXECUTIVE SUMMARY OF GRADUATING SENIOR SURVEY 2012-2013

This report summarizes the major findings from the Florida International University *Graduating Senior Survey*, a Continuous Quality Improvement study conducted by the Office of Planning and Institutional Research. This survey was adapted from a prototype survey developed by the State University System (SUS) Accountability Committee on Survey Activity (Legg, Final Report, 1992). This survey was designed to measure graduating students' satisfaction with and attitudes about Florida International University. The survey design assured each individual respondent of his or her anonymity in an attempt to facilitate candor.

Since the summer 2011 term, the Graduating Senior Survey was transitioned from Class Climate, v4.0 to Panthersoft. The survey was condensed to ten questions with two sub categories, making it more appealing to students. The Graduating Senior Survey was distributed to 7,733 students who were intended members of the graduating classes of summer 2012-Spring 2013. The comprehensive survey asked questions about the graduating seniors' satisfaction with their experiences at Florida International University and quality of services as well as their frequency of use of services such as Orientation, Admissions Office, Advising Office, Recreational Services, On-campus student employment, and Health Services to name a few.

Eight principal indicators have been singled out as the most reliable measures of the graduating seniors' satisfaction with FIU. They have been summarized below.

Please indicate the extent of your agreement with the statement as it describes your experience at the university within my undergraduate degree program or because of my experiences at FIU,

I: (Note: All responses have been rounded to the nearest percent and may not add up to total)

- *Acquired basic knowledge:* 93% of respondent seniors indicated they have acquired basic knowledge (60% strongly agree, 33% agree).
- *Felt challenged:* 86% of respondent seniors indicated that they had been academically challenged (48% strongly agree, 38% agree).
- *Developed the ability to write effectively:* 84% of respondent seniors indicated they developed the ability to write effectively (46% strongly agree, 38% agree).
- *Felt adequately prepared for graduate study:* 84% of respondent of seniors indicated they felt adequately prepared for graduate study in their major field (45% strongly agree, 40% agree).
- *Was prepared to assume responsibilities of my chosen profession:* 85% of respondent of seniors felt prepared to assume the responsibilities of their chosen profession (48% strongly agree, 37% agree).

- *Was able to express myself effectively through speaking:* 85% of respondent of seniors indicated they developed the ability to express themselves effectively through speaking (50% strongly agree, 36% agree).
- *Developed multicultural and global perspectives:* 86% of respondent of seniors indicated they developed multicultural and global perspectives (54% strongly agree, 32% agree)
- *Would Recommend FIU:* 86% of respondent seniors reported that they would recommend FIU others (55% strongly agree, 31% agree).

Items with the Highest Correlations:

- To the extent that graduating respondents believed they felt adequately prepared for graduate study in their major field, they also believed they were prepared to assume the responsibilities of their chosen profession ($rs = .72, p < .001$).
- To the extent that graduating respondents believed they developed multicultural and global perspectives, they also felt their oral communication was enhanced ($rs = .59, p < .001$).
- To the extent that graduating respondents believed they enhanced their oral communication, they also believed they were prepared to assume the responsibilities of their chosen profession ($rs = .58, p < 001$).
- To the extent that graduating respondents believed they were academically challenged, they also believed they acquired basic knowledge ($rs = .51, p < .001$).
- To the extent that graduating respondents developed multicultural and global perspectives, they also were likely to recommend FIU to others ($rs = .56, p < .001$).
