EXECUTIVE SUMMARY OF THE *GRADUATING MASTERS AND DOCTORAL STUDENT SURVEY* SUMMER 2013 - SPRING 2014

This report summarizes the main findings from the SUMMER 2013 - SPRING 2014. Florida International University *Graduating Masters and Doctoral Student Survey*, a Continuous Quality Improvement study conducted by the Office of Planning and Institutional Research. This survey was adapted from a prototype survey developed by the SUS Accountability Committee on Survey Activity (Legg, Final Report, 1992). The survey was designed to measure graduates' satisfaction with and attitudes about Florida International University. The survey design assured respondents of their anonymity in an attempt to facilitate candor.

As of the Summer 2011 term, the *Graduating Masters and Doctoral Student Survey* became part of graduation packet. Students were asked to fill out the survey upon submitting their graduation application. The students who were assessed were from the graduating classes of Summer 2013, Fall 2013 and Spring 2014. Three-thousand two-hundred forty students completed the survey. The comprehensive survey asked questions about the graduates' satisfaction with Florida International University in various domains such as the quality and availability of faculty in their major, the quality of research produced in the graduate program, the quality and availability of academic advising by university advising staff and faculty members, and the quality of the libraries. The survey also questioned graduates about the frequency of use and quality of services such as Counseling and Psychological Services, Recreational Services, and Health Services.
